

Introduction

Eco-Responsibility

Environmental Resources

Environmental resources are common goods that must be managed sustainably for the benefit of all people. We operate in various geographies which influences how we manage environmental resource use on a per country basis. As a result, we work to remain compliant with the national laws and environmental regulations of the countries in which we operate while maintaining group-wide standards. MTN strives to consult with stakeholders on environmental issues where appropriate and has a formal system for identifying stakeholders, supported by the Group Stakeholder Engagement Policy which standardises stakeholder engagement practices across all markets

MTN approach

- ISO 14001 certified operations in select markets.
- As part of our disclosure efforts, we participate in a Carbon Disclosure Project in alignment with the Taskforce recommendations on Climate-related Financial Disclosures on an annual basis.
- The Ten Principles of the United Nations Global Compact as a signatory.

Key principles

- Commitment to environmental protection.
- Commitment to create environmental awareness.
- Commitment to implement an environmental management system.
- Commitment to use natural resources or energy more efficiently.
- Commitment to reduce emissions, releases and waste.
- Commitment to monitor the Company's environmental performance.
- Commitment to report regularly on environmental issues.
